Supervisor Federal Glover: It's easy being green

PITTSBURG (Oct. 21, 2009) -- Supervisor Federal Glover is proud to announce that his office recently became certified as a Green Business with recognition from the Bay Area Green Business Program. In attaining this certification, Supervisor Glover is encouraging all fellow East Contra Costa County businesses to strive for this accomplishment as well.

"I want my office to be a role model for all businesses in the County," said Glover. "Now, more than ever, we need to prevent pollution and conserve resources. We all should take a minute and look at our current workplace and see what we can do to improve the environment."

Glover has committed his office to become a healthier and cleaner workplace for his staff and all of his constituents when they meet with him. The supervisor took some simple actions to receive the Green Business designation including:

- Buying only recycled paper and copying double-sided
- Cleaning with less toxic products
- Using efficient lighting systems to save energy
- Remodeling his office with green materials and low-VOC paint
- Recycling all office paper and ink cartridges
- Conserving water with low-flow toilets and faucet aerators.

"I strongly encourage everyone to improve their current facilities by looking at ways to improve and meet the high standards for environmental performance," said Glover.

To join or for more information about the Green Business Program, call (925) 646-2286.
