FOR IMMEDIATE RELEASE

Contra Costa County to Begin Repairs to Morgan Territory Road at Slide Area

Work begins Monday, July 17, to repair the section of Morgan Territory Road located approximately 1 mile south of Marsh Creek Road in the Clayton area that was damaged during winter storms. Contra Costa County awarded a contract to Flatiron West, Inc., to do the repair work, with an estimated completion in mid-October. The repair work includes the installation of two structural retaining walls, excavation and backfill of embankment between the retaining walls, reconstruction of the pavement, drainage improvements, installation of a water main, and pavement striping.

During the construction period, the damaged stretch of Morgan Territory Road will be completely closed to vehicles, pedestrians and bicyclists. A temporary, alternate access is available for Morgan Territory residents. For project updates visit the Public Works website at: <http://www.cccounty.us/pwdmap>.
