# Addressing Concerns about Proposed Citizenship Question

The Census should count everybody. Yet, every Census “undercounts” people of color, immigrants, and other hard-to-count populations. The danger of an undercount is worsened with Census 2020 because of the Census Bureau’s recent efforts to add a citizenship question, which is raising fears that Census data might be used to target people. Here’s what you need to know:

- Census responses are confidential and there are very strong laws protecting your data.
- Under law, the U.S. Census Bureau cannot share an individual’s Census data with the public, state or local governments, immigration enforcement, or other federal agencies.
- Additionally, Census data can only be used for statistical purposes, and cannot be used to harm people who respond.

Advancing Justice – Asian Law Caucus has attorneys who can speak with community-based organizations about these issues free of cost. Please contact Julia Marks at [juliam@advancingjustice-alc.org](mailto:juliam@advancingjustice-alc.org)
